General Configuration

The fields under General Settings allow you to set up various global parameters in Artifactory.

Artifactory General Settings

General settings

* File Upload In UI Max Size (MB) 

Global Offline Mode 

Archive Search Enabled

The General Settings fields are as follows:

File Upload Max Size	Maximum size allowed for files uploaded via the web interface.
Global Offline Mode	When selected, Artifactory will behave as if it is not connected to an external network (such as the internet), and therefore, will not query remote repositories (regardless of the offline status of any specific remote repository).

Global Replication Blocking

Configuring Global Replication Blocking allows you to enable or disable replication globally as needed.

Global Replication Blocking

Block Replications 

Block Push Replications 

Block Pull Replications 

Block Replications	When set, push and pull replication will be blocked according to the check boxes below, regardless of the configuration for specific repositories.
Block Push Replications	When set, push replication will be blocked regardless of the configuration for specific repositories.
Block Pull Replications	When set, pull replication will be blocked regardless of the configuration for specific repositories.

Folder Download Settings

Folder Download Settings

Enable Folder Download

Enable Folder Download For Anonymous Access

Max Size [?](#)

1024

Max Number of Files [?](#)

5000

Max Parallel Folder Downloads [?](#)

10

Enable Folder Download	Must be set to enable folder download
Enable Folder Download For Anonymous Access	Must be set to enable folder download for anonymous users.
Max Size	The maximum size (in MB) of a folder that may be downloaded.
Max Number of Files	The maximum number artifacts that may be downloaded under one folder.
Max Parallel Folder Downloads	The maximum number of folder download requests that may be run concurrently.

Release Bundle Settings

In the **Administration** module | **Artifactory** | **General** | **Settings** in the **Release Bundle Settings** tab., you can set the number of hours to wait before a release bundle is declared "incomplete" and eligible for cleanup from the temporary folder. A value of 0 means automatic cleanup is disabled. note that only release bundles that we partially distributed are eligible for cleanup.

Release Bundle Settings

Incomplete Release Bundles Cleanup Period (Hr) [?](#)

720

Incomplete Release Bundle Cleanup Period (Hr)	<p>The number of hours to wait before a partially distributed release bundle is set as "incomplete" and eligible for cleanup from the temporary folder.</p> <p>Setting the value to "0" indicates that automatic cleanup is disabled.</p>
---	---
