

Welcome to Artifactory

Welcome to the JFrog Artifactory User Guide!

JFrog Artifactory is the only Universal Repository Manager supporting all major packaging formats, build tools and CI servers.

This user guide is for Artifactory 6.0.0 and above.

Note that the online version may be more up-to-date.

If you are using Artifactory 5.x.y, please refer to the [Artifactory 5 User Guide](#).

If you are using Artifactory 4.x.y, please refer to the [Artifactory 4 User Guide](#).

Which Artifactory Do You Need?

Artifactory comes in the following flavors:

Artifactory OSS	Offers powerful features with fine-grained permission control behind a sleek and easy-to-use UI. Using the links in the next column, you can download the Artifactory OSS installation files, or the source files so you can build Artifactory OSS yourself. For more information on building Artifactory OSS, please refer to the Readme file .	Download
Artifactory Pro	Exposes a set of professional add-ons , on top of those already available to you from Artifactory Open Source, opening up a whole world of features that empower you to manage your binaries and integrate with industry standard tools in your development and deployment ecosystem.	
Artifactory Cloud	JFrog's SaaS-based solution for managing your artifacts and binary repositories in the cloud with the full power of Artifactory Pro behind you and 24/7 SLA-based support.	Register
Artifactory Enterprise	Exposes an enterprise feature set such as cloud storage providers, advanced capabilities for replication, high availability and more	Enterprise Free Trial
Artifactory Community Edition for C/C++	Offers powerful features with fine-grained permission control behind a sleek and easy-to-use UI. This version of artifactory is focused on providing everything you need to get started with C/C++ development using generic repositories and the JFrog CLI, and the Conan package manager. The Conan package manager is the premier tool for C/C++ binary package management. For more information check out the conan.io website.
