

Xray Integration with Microsoft Azure ARM Template for Xray

Overview

The Microsoft Azure ARM Template allows Microsoft Azure users to deploy a high availability instance of JFrog Xray with a few keystrokes. The ARM template is built in conjunction with Azure engineers to ensure best practices during deployment.

Prerequisites

- An active Azure subscription
- Spare vCPUs available in your region in Azure
- An existing Artifactory instance
- Deployed PSQL instance (Optional)

- [Upgrading Microsoft ARM Template](#)

Setting up the Xray Microsoft Azure ARM Template

1. Go to the [JFrog Xray Enterprise listing](#).
2. Select **GET IT NOW** and then **Continue | Create**.
3. In the **Basics** tab, fill out the Subscription, Resources Group and Region.
4. Complete the form, using the Artifactory Join key, which you can copy from the Artifactory UI, **Security | Settings | Connection Details**.
5. Select **Review | Create**.
The process is complete. Start-up Xray to view the changes in your existing JFrog Platform UI.

Upgrading Microsoft ARM Template

To upgrade, refer to [JFrog Xray ARM template README](#).
