

Welcome to Artifactory

Welcome to the JFrog Artifactory User Guide!

JFrog Artifactory is the only Universal Repository Manager supporting all major packaging formats, build tools and CI servers.

This user guide is for **Artifactory 4.x**.

Click this link to download the PDF version of the Artifactory v4.16 User Guide:

Note that the online version may be more up-to-date.

If you are using Artifactory 3.x.y, please refer to the [Artifactory 3 User Guide](#).

Which Artifactory Do You Need?

Artifactory comes in three flavors:

Artifactory OSS	<p>Offers powerful enterprise feature and fine-grained permission control behind a sleek and easy-to-use UI.</p> <p>Using the links in the next column, you can download the Artifactory OSS installation files, or the source files so you can build Artifactory OSS yourself.</p> <p>For more information on building Artifactory OSS, please refer to the Readme file.</p>	Download Download Sources
Artifactory Pro	<p>Exposes a set of professional add-ons, on top of those already available to you from Artifactory Open Source, opening up a whole world of</p> <p>features that empower you to manage your binaries and integrate with industry standard tools in your development and deployment ecosystem.</p>	Download
Artifactory Cloud	<p>JFrog's SaaS-based solution for managing your artifacts and binary repositories in the cloud with the full power of Artifactory Pro behind you and 24/7 SLA-based support.</p>	Register

To see which version of Artifactory best suits your needs, please see the [Artifactory Features Matrix](#).

Distributing Software Through Bintray

Bintray is JFrog's universal distribution platform.

Through tight integration, you can use Artifactory to push artifacts directly to your repositories in Bintray, search through your Bintray repositories and more to fully automate your software distribution process. For more details, please refer to [Bintray Integration](#).

For more details on how to use Bintray, please refer to the [Bintray User Guide](#).
