

NuGet Search details 2

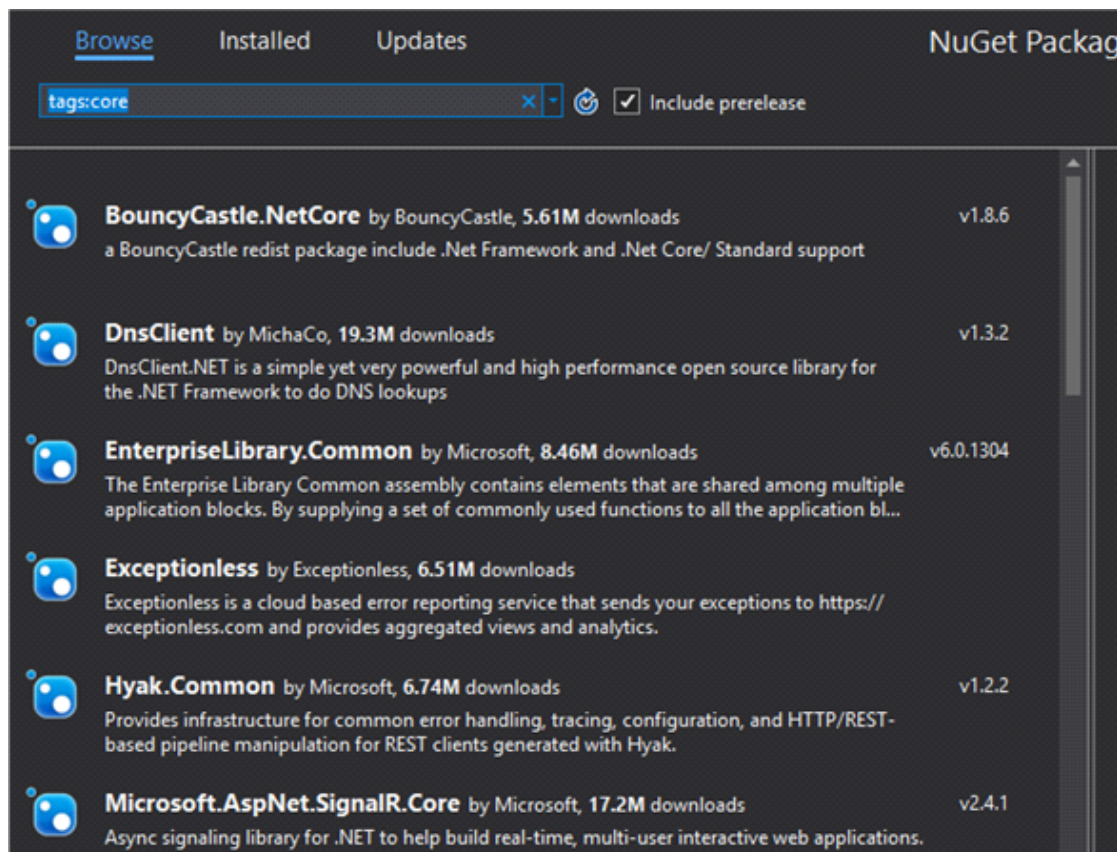

Friday, July 31, 2020 8:05 PM

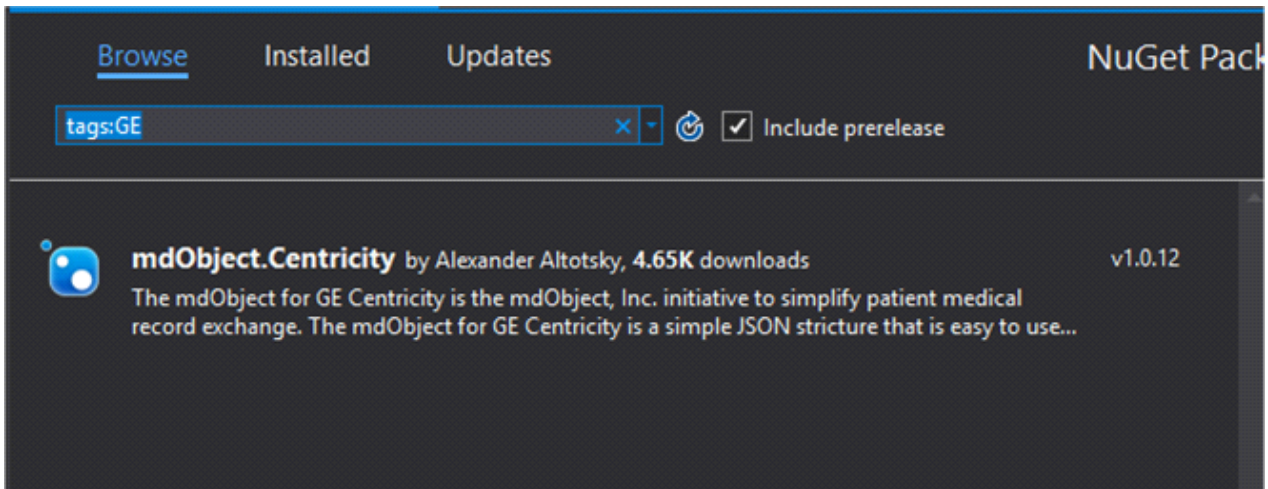

Examples

- Tags show up for our package (MLCoreTypes) when we search for the package by name, but we also get other results even through the packageID is a match

- When searching by the listed tags, other packages show up (from nuget.org / internet-nuget), but not from our packages.

- Artifactory searches return the package, but doesn't allow tag search options

JFrog Artifactory
